

Jigsawsafe[®]

PART OF THE JIGSAW BUSINESS GROUP

Driving Change: Delivering Results

Jigsawsafe[®] is a
Secure **A**uthorised **F**ield **E**valuation
tool, that incorporates patented
technologies that will transform the
way you work and manage your supply
chain. Saving you time and money,
while reducing your carbon footprint.

Allowing you to remotely see and
verify in real time what is actually
happening in your supply chain,
ensuring fact driven discussion and
action planning.

About Jigsawsafe®

Jigsawsafe's® unique patented technology enables teams – across various global locations – to be “onsite” from their desk, assured that data:

- Can be captured securely and evidentially
- Can be compressed for easier transmission and storage
- Can be viewed in real time
- Can be stored directly and securely to a server
- Is tamper proof with any modification auditable.

Industry Applications

e-Gemba, providing an alternative to Gemba that is secure, evidential and cost effective, Jigsawsafe® works across a number of industrial applications where witnessed evidence is required that is both digitally secure and tamper proof.

Applications include:

- Stock verification
- Tooling sign-off
- Supplier qualification
- Capacity and process verification
- Proof of concept
- Proof of remedial work
- Proof of final quality check
- Witnessed certification

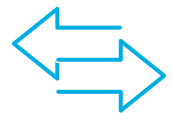

Verifiable evidence

Encrypted file compression

Drastically improve productivity

Faster decision making

Reduced Carbon Impact

More complete picture

How it Works

There are three integrated components to the Jigsawsafe® patented technology.

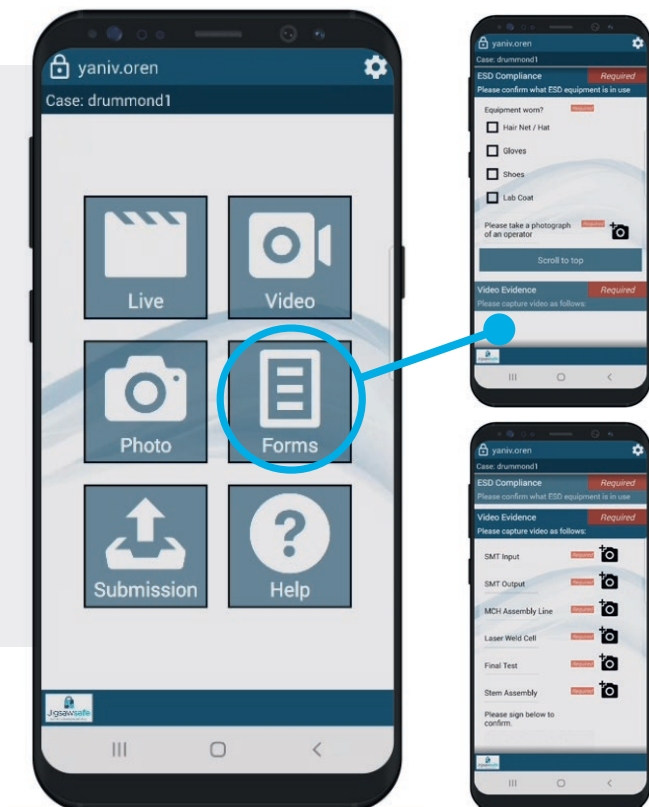

1. Pro App

This is the front end of the Jigsawsafe® product, used where a remote recorded event is needed.

Available on both iOS and Android, Pro App can record data in either scripted or unscripted formats meaning clients can choose the set-up best suited to their needs. For many, this is likely to be a scripted format and – utilising over 100 years' combined industrial experience across multiple supply chains and STEM sectors – the Jigsawsafe® team has compiled a comprehensive library of Forms designed to seamlessly and methodically guide clients through any field evaluation process.

Functionality includes:

- Remote party two-way call capability
- Video and image taking capacity
- Configurable work flow form section
- Secure media storage and encryption
- Unique, tamper proof technology
- Viewing and editing capacity
- The removal of all digital imprints on upload.

How it Works

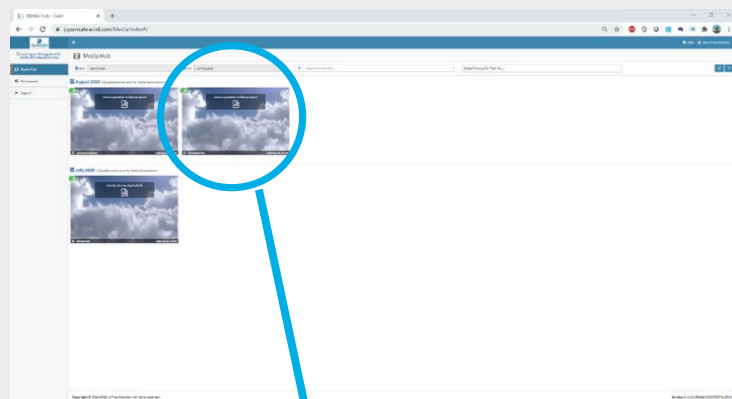

2. Media Hub

This is the browser-based element of the Jigsawsafe® product, enabling several parties to access the data simultaneously or separately either physically or remotely.

Clients can select the data they wish to view, and in the format they wish to view it, apply any filters, share with both internal and external parties and hold two-way calls.

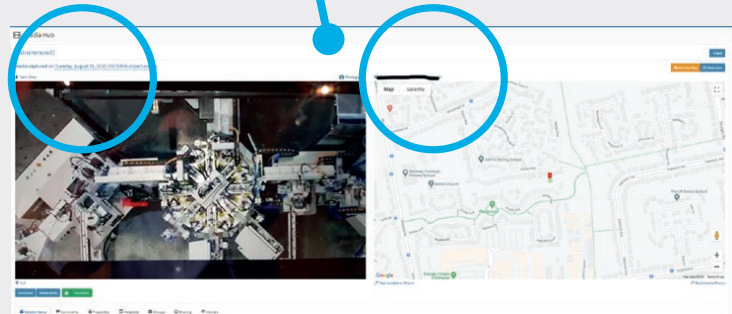

Benefits include:

- Promotion of data driven decision making
- Elimination of travel time and associated costs
- Significant efficiency improvements
- Substantial carbon footprint reduction
- Complete visibility on file shares and access
- Full data control with allocated timeslots and access
- Ability to work remotely, safely, securely and eliminating business risk.

Geo stamp

How it Works

3. Uploader

This element of the Jigsawsafe® technology provides the flexibility to add supporting files to an existing event not captured using Pro App.

Benefits include:

- Compatibility with over 40 file types

- The capacity for both internal and external uploads

- Secure storage, virus scanning and encryption

- Encrypted sequencing included as part of the original event.

Choosing Jigsawsafe®

Jigsawsafe® patented technology is the first product of its type to provide collaborative, digitally secure, risk free and tamper proof data gathering and storage.

Jigsawsafe® provides cutting edge industry benefits never before experienced and which include:

- ✓ Intuitive, user friendly app and browser interfacing
- ✓ Leading compression technology
- ✓ Evident proof encryption
- ✓ Best practice form library scripting
- ✓ Significant cost reductions
- ✓ Substantial carbon reductions
- ✓ Marked increases in cost efficiencies.

A breakthrough in supply chain management, Jigsawsafe® is a Secure Authorised Field Evaluation tool that will revolutionise the management of supply chains - where a witness recorded event is needed - and transform working practices beyond all recognition.
